Anova Culinary App	The Anova Culinary App is the companion app to the Anova Precision Cooker. The iPhone App makes it incredibly easy to cook anything you want with Anova. You simply find the food you're cooking, adjust the settings you'd like, and hit start. With our exclusive Serious Eats steak guide, there's no need to search for time and temperature settings to cook the perfect steak. It will all be programmed into your phone. New time and temperature guides will be added regularly so you can cook anything you want at the touch of a button.
About Precision Cooking	Precision cooking is often referred to as sous vide, which means "under vacuum." However, you don't need to vacuum seal your food to cook sous vide. Instead, this technique is really about bringing food to a very precise temperature and holding it there for a period of time. The circulation of water ensures food is cooked perfectly edge to edge with a consistent temperature throughout.

Features

- Pairs with the Anova Precision Cooker via Bluetooth
- Operates the device remotely when connected and within range (set your time, temperature, and toggle between Fahrenheit and Celsius)
- Calibrates the Precision Cooker temperature to the nearest .01 degree F/C
- Provides exclusive access to our library of recipes featuring James Beard award-winning chefs, renowned cookbook authors, food editors, television personalities, and more
- Choose a recipe and press play! Once you're paired with the device, simply select what you'd like to cook and press play to automatically set the device to the required time and temperature settings
- Receive push notifications when the device is preheating, reached temperature, and when the timer has finished
- Sort recipes by category
- Save recipes to your "favorites"

Requirements

- iOS 7 or later and the iPhone 4s or newer
- Android 4.3, Bluetooth 4.0 LE
- Anova Precision Cooker

Price   Free
